

Loapham Institute,
N. Scituate, R. I.
Aug' 12, 1877.

Dear Watson,

Many thanks for your
favor of yesterday. I was sure the thing
would prove to be an old acquaintance,
but I failed utterly in my recognition of
it. The flowers I am very familiar with,
but the fruit was quite out of my ken.

I am enjoying my work here very
much - and my class is doing finely.
It is a good collecting region, and I can
always secure illustrations for the class-
room. Boating, fishing, bathing, and
walking, fill up the measure of the
day. Regards to Dr Goodale and Wilson.

Yours truly
W. W. Bailey
